

endoscope care and cleaning

**us** endoscopy

*listening...and delivering solutions®*

# infection control

*With infection control as a top priority in GI units, proper endoscope reprocessing is a vital step in preventing cross-contamination.*

The Society of Gastroenterology Nurses & Associates (SGNA) states that manual cleaning of endoscopes is the most important step in removing the microbial burden from an endoscope.\*

\*Standards of Infection Control in Reprocessing of Flexible Gastrointestinal Endoscopes (SGNA 2015)

***The US Endoscopy Care and Cleaning*** line offers an array of single-use cleaning brushes to fit your cleaning needs. Our brushes feature key elements needed for proper care of delicate endoscopes, including...

- *Textured, non-slip catheters to help maintain your grip in slippery environments*
- *Soft, specially designed nylon bristles to maximize cleaning efforts*
- *Rounded, fluorescent tips to protect against inadvertent scope damage and for easy visualization when immersed*

care and cleaning

From every day to specialty cleaning needs, US Endoscopy has a solution that

## Standard

### **standard channel cleaning brush**

A simple solution for cleaning standard endoscope channels

### **Gemini Brush™ double-ended channel brush**

Double-ended design allows cleaning staff to scrub twice as well with half the effort. Push material through the channel with the leading brush and pull remaining material out with the trailing brush

### **Double-Header™ combination channel and valve/control head cleaning brush**

All-in-one brush features a channel brush at one end, and our premium valve/control head brush at the other

### **Wooly Brush® channel brush**

Stiffer catheter and 60% longer bristle head maximizes cleaning ability by boosting bristle touches throughout the channel

is right for you.

### **DuoSwift™ combination squeegee brush**

Features a tapered nylon brush on the leading end and a series of squeegees on the trailing end to effectively loosen and remove bioburden from flexible endoscopes

## **Specialty**

### **valve/control head cleaning brush**

Features a full head of soft bristles and grooved, barbell design for a steady, comfortable grip

### **jumbo channel cleaning brush / jumbo enteroscope channel cleaning brush**

Larger bristle diameter sized specifically to scrub biopsy channels 2.8mm and larger

### **Small Wonder® channel brush**

Specialized, miniature cleaning brush with non-slip braided wire shaft is designed for brushing in narrow scope channels

### ***Continuing Education***

The US Endoscopy Sales team is committed to providing continuing education to ensure you have the latest information on care and cleaning devices and techniques.

During our ***Endoscope Care & Cleaning: From Start to Finish*** course (one credit hour) you will learn about...

- The components of an endoscope, common causes for repair, and techniques to prevent damage
- SGNA cleaning and reprocessing standards, guidelines, and position statements
- Each step of the cleaning process and how to properly track effectiveness
- Features and benefits of care and cleaning accessories for flexible endoscopes

***Contact your US Endoscopy Representative to schedule.***
