

Danis Seal

Esophageal Stent Danis Seal

Danis Seal

Removable stent for treatment of esophageal leaks and ruptures

Large diameter with optimum length and expansion force

Durable silicone covering

Special anti-migration design

Basic description

Esophageal Stent Danis Seal

Danis Seal is designed to give maximum support to assist in healing leaks. Special innovative features make this stent the choice for this special indication.

Indications

Treatment of esophageal or gastric leakage from:

- Anastomotic wound dehiscence (esophagectomy, gastric bypass)
- Esophageal ruptures / perforations (spontaneous rupture - Boerhaave's syndrome; iatrogenic rupture / perforation occurring during esophageal dilations, endoscopic manipulations, traumatic esophageal ruptures due to blunt thoracic trauma)
- Patients presenting with delayed esophageal or gastric leakage (to avoid esophageal diversion). The stenting is associated with decortication and muscle flap reinforcement

Features and Benefits

- ✓ Variable pitches in stent weaving and wide diameter of the stent / Reduced migration
- ✓ Atraumatic stent ends / Safety of use
- ✓ Radiopaque markers at both stent ends and at the midpoint / Accurate stent positioning
- ✓ Retrieval loops made of medical grade alloy at both stent ends / Simple endoscopic stent removal with ELLA Extractor
- ✓ Durable silicone covering / High mechanical durability and acid resistance

Contraindications

Patients unable to pass endoscopy
Esophageal, lung, tracheal and laryngeal malignancies or lymphoma producing non-healing leaks
Non-viable / necrotic jejunal conduit forming gastric bypass
Completely separated anastomosis

Additional description

Wide diameter of the stent aids optimal grip on esophageal wall. Durable silicone covering with internal-smooth / external-roughened surface. Smart wire pattern and flared ends reduce potential migration. Narrow uncovered rims of the stent enable mucosal ingrowth for sealing stent-tissue interspace. Durable metallic retrieval loops facilitate stent removal.

Available sizes

REF No.	Esophageal Stent Danis Seal			Delivery system	
	Stent flares diameter [mm]	Stent body diameter [mm]	Nominal length [mm]	Active length [cm]	Outer diameter [F]
019-11-25-135	30	25	135	75	28/18

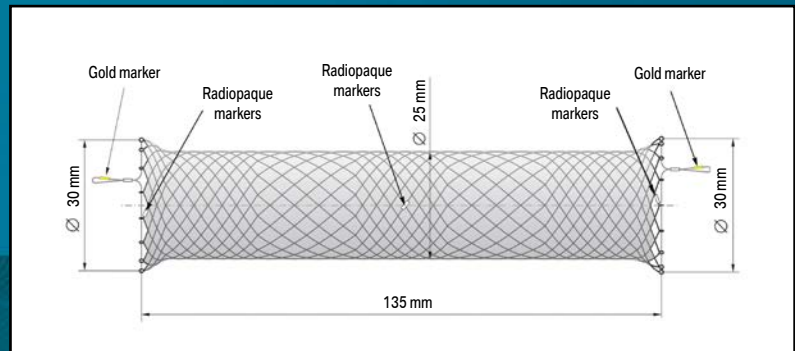

Delivery system

Compact olive tip

Shaft and sheath handles
